**LIVING LAB – MANITOBA (LL-MB) IS A RESEARCH-BASED PROGRAM THAT COLLABORATES WITH AGRICULTURAL PRODUCERS TO DEVELOP GRASSROOTS SOLUTIONS FOR REDUCING AGRICULTURAL IMPACTS ON CLIMATE AND ENVIRONMENT.**

**LL-MB IS BUILT IN PARTNERSHIP WITH AND DELIVERED BY MANITOBA'S 14 WATERSHED DISTRICTS AND WAS DEVELOPED IN COLLABORATION WITH A HIGHLY ENGAGED NETWORK OF LOCAL AGRICULTURAL PRODUCERS, INDUSTRY GROUPS, INDIGENOUS GROUPS, AND NONPROFIT GROUPS.**

**FUNDED THROUGH AGRICULTURE & AGRI-FOOD CANADA, LL-MB IS A FIVE-YEAR PROJECT THAT AIMS TO SLASH GREENHOUSE GAS EMISSIONS, ENHANCE CARBON SEQUESTRATION, AND PROTECT WATER THROUGH ENHANCED LAND MANAGEMENT AND INTEGRATED WATERSHED MANAGEMENT.**

**RESEARCH PROJECTS DONE ON LOCAL MANITOBA FARMS WILL INFORM THE DEVELOPMENT OF NEW AND INNOVATIVE AGRICULTURAL PRACTICES AND WILL PROVIDE A SOLID FOUNDATION FOR FURTHER POLICY PLANNING SURROUNDING AGRICULTURAL PRODUCTION.**
